Table 1: Total amount of hazardous wastes* generated (as reported by Parties) 2004-2006

Figures are in metric tons and rounded to the nearest integer.

| | | | Name of the last o | | | rigures are in | metric tons and re | | earest mieger. |

^{*}Basel Convention Article 1 (scope of the Convention): "1. The following wastes that are subject to transboundary movement shall be "hazardous wastes" for the purpose of this Convention: (a) Wastes that belong to any category contained in Annex I, unless they do not possess any of the characteristics contained in Annex III; and (b) Wastes that are not covered under paragraph (a) but are defined as, or are considered to be, hazardous wastes by the domestic legislation of the Party of export, import or transit".

Blank cells: the cells are left blank when the listed Party (i) did not transmit its national report for the specified year(s) (ii) was not required to transmit the national report depending on the date upon which it became a Party to the Convention (iii) remarked that the reported amount is in litres, in cubic metres or an estimated amount (iv) informed that the requested data is not available (v) did not respond to the specific item(s) of the revised questionnaire on 'transmission of information' (Tables 6, 7, 8A and 8B) or (vi) did not provide clarification sought by the Secretariat (as at 22 June 2009).

| provide clarification soug | gut by ui | e Secretariat (as at 22 June 2009). |
|----------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Party | Year | Remarks |
| Belgium | 2004 - 2005 | Figures are for Flemish region. |
| Bolivia | 2005 | 814,511 metric tons corresponde a residuos sólidos recolectados por Empresas Municipales de Aseo y depósitados en rellenos sanitarios autorizados, por tanto no corresponden a desechos peligrosos específicos. |
| China | 2004 - 2006 | Total amount of hazardous wastes under Art.1(1)(a) includes only data of mainland of China. There is no data on the amount of hazardous wastes generated under Art. 1(1)(b) in China. |
| Croatia | 2004 - 2005 | No data on Article 1 (1)(b) wastes. |
| Estonia | 2004 - | By Estonian Law there is no data collection according to Y-codes. Data collected according to the European Waste Catalogue. |
| Finland | 2004 - 2005 | Due to classification differences between Annex I of the Basel Convention and the national waste classification it is not possible to differentiate hazardous wastes under Article 1(1)(a) from hazardous wastes under Art. 1(1)(b). |
| France | 2004 | The data are not available according to the "Basel format". It means that the total amount of hazardous waste is according to the French definition. Source: IFEN (French Institute for environmental statistics). 2004 is the entry into force of the Regulation n°2150/2002 on waste statistics and the first calculation of generation of waste on a different basis. |
| Greece | 2004 | Figure includes 85,000 metric tons of used oils and 38,000 metric tons of batteries which are recycled as separate streams of hazardous wastes as well as 26,000 metric tons of clinical wastes which are incinerated. |
| | | This data is not comparable with data of former years because new categorisation put in force for annual reporting of waste in Hungary. |
| Hungary | 2004- 2006 | According to the Hungarian Legislation, residues arising from the incineration of household wastes (Y47) are hazardous wastes. Therefore, these wastes are included in both the total amount of hazardous wastes under Art. 1 (1)(b) generated and the total amount of other wastes generated (Annex II: Y46-Y47). |
| Indonesia | 2004 - .2006 | National hazardous waste data is not transferable into classification of hazardous waste as defined by the Basel Convention. For this reason, total generation of hazardous waste and other waste in 2006 and the previous years is not available. |
| Treland | THE REPORT OF STREET | Data from National Waste Database Reports 1995 and 1998 and from Proposed National Hazardous Waste Management Plan, 1999. |
| Japan | 2004 - | Amounts of generation of hazardous wastes under Art.1(1)(a) are not available as Japan's waste classification system for the internal waste control is different from those of Basel Convention. |
| :Latvia | 2004 – 2005 | The sharp decrease in the amount of generated hazardous wastes is caused by changes in the classification of waste. The biggest producer of hazardous waste - metallurgical plant- has provided sufficient evidence that waste from metallurgical processes have to be classified as non- hazardous waste. |
| | 2006 | Considerable increase in generation of hazardous wastes is caused by increased production at metallurgical plant, as it is linked with increased amounts of generated waste. |
| Republic of Korea | | The value under the column 'BC Article 1(1)(b) wastes' refer to the amount of hazardous wastes which are not suitable to be classified under Annex I (Y1-Y45). |

| Party | Year | Remarks |
|--------------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Russian Federation | 2004 | Generally wastes of I-III hazard class relate to Y1-Y45 categories. Hazard class of wastes is determined in accordance with Categories of attribution of hazardous wastes to hazard class for natural environment approved by the Order N° 511 of June 15, 2001 of MNR of Russian Federarion. Generation of hazardous waste in 2004: I hazard class (extreme hazard) - 0,34 mln tonnes, II hazard class (high hazard) - 1,62 mln tonnes, III hazard class (high hazard) - 7,87 mln tonnes, IV hazard class (low hazard) - 133,88 mln tonnes, V hazard class (practically non-hazard) 2491,94 mln tonnes. |
| Slovakia | 2004 - 2006 | Amount reported for Article 1 (1)(b) wastes includes amount generated for Y47. The National Waste Catalogue harmonised with the European Waste Catalogue is used for reporting. Since 2004, the national waste management legislation has changed. Slovakia as EU member state transposes many EU regulations into national legislation. Also the National Waste Catalogue was replaced by EWC for waste classification. This fact could affect the output data (decreasing amounts) for the years 2004-2006. |
| Slovenia | 2004 - 2006 | Data collected according to EWC codes. The presented data are correlated from EWC to Y codes on the basis of official statistical correlation between EWC and Y codes. |
| Spain | 2004- 2006 | Figure refers to total amount of hazardous industrial wastes generated (excluding wastes from mining activities and from mineral processing activities). |
| Ükraine | 2005 | The forms of statistic accounting on wastes and wastes nomenclature in Ukraine are not in accordance with the Basel Convention List. The figures filled in the table 8A (the first row) of the revised questionnaire on 'transmission of information' attributes to the hazardous wastes of I-III classes of hazard (toxicity) in accordance with the Ukrainian classification and of TV class (the second row)(for 2004: 60,500,000 metric tons) of hazard. The accounting system dealing with waste generation in Ukraine is not perfect. Sometimes this system is changed which results in considerable changes in the values of data. E.g. reduction in the total amount of the IV class hazardous wastes in 2004 in comparison with 2003 is the result of excluding mining wastes from the category of hazardous (toxic) wastes and is not connected with any technical measures. |

| Party | Year | Estimated data |
|----------------------|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | 2004 | Estimated amount: 222,813 metric tons. |
| | 2005 | Estimated amount: 221,802 metric tons. |
| Algeria | 2006 | Estimated quantity of special industrial waste generated/year: 325,000 metric tons. Quantity of stock-piled special industrial waste/year: 2,008,500 metric tons.(Reference: The national special industrial waste register in 2002.) |
| Argentina | 2004 - 2006 | There is no official inventory of hazardous wastes generation. Existing estimations are incomplete. Estimated amounts: for 2004: 88,587 metric tons; for 2005: 115,065 metric tons; and for 2006: 151,923 metric tons. |
| Bosnia & Herzegovina | | Estimated amounts. For 2004: 6,560 metric tons; for 2005: 6,660 metric tons; and for 2006: 4,447 metric tons. Data based on the quantity of hazardous wastes exported. |
| Cyprus | | Estimated amounts. For 2005: 32,719 metric tons (In addition, 5,000m³ of Y36 was generated) and for 2006: 50,443 metric tons. |
| Kiribati | | Estimated amount: 82 metric tons. |
| Madagascar | 2004- 2006 | Estimated amounts - Y1, Y2, Y3: 2.8 metric tons/week in the capital city. |
| Mexico | 2006 | Estimated amount: 8,000,000 metric tons. |
| Morocco | 2004 - .2006 | Estimated amount: 131,000 metric tons. |

| Party | Year | Estimated data |
|----------------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | 2005 | No se tiene reporte autualizado, falta de recursos economicos para realizar la investigación. |
| Paraguay | 2006 | Estimated amount: 864 litros de PCBs. 5.000 kg/día de Residuos Hospitalarios. |
| Sri Lanka | 2004 - 2006 | Estimated amounts based on a survey done in 1996 & 2002. For 2004: 40,617 metric tons; for 2005 and 2006: 57,889 metric tons. |
| Turkey | 2004 | Total industrial waste calculated by Turkish Statistical Agency: 1,120,000 metric tons. |
| | eritani di dinaktiriri unumba | Estimated amount: for 2004: 5,153,108 metric tons; for 2005: 4,120,129 metric tons; and for 2006: 6,037,068 metric tons. |
| | | Theses figures are for England and Wales. Figures for 2005 based on data collected under the "Special waste" regime combined with the new Hazardous waste regime in England and Wales. The data for 2006 are based on the new Hazardous Waste regime, with increased types of hazardous waste and are not directly comparable with earlier years. |
| United Kingdom | 2004 - 2006 | The estimate of hazardous waste arisings in the UK is taken from data collected under the Special Waste Regulations 1996 (as amended) and the Special Waste Regulations (Northern Ireland) 1998. Under these Regulations all domestic movements of 'special waste' are tracked by consignment notes. The definition of hazardous waste for domestic movement used within these Regulations is derived from EC Directive 91/689/EC on hazardous waste and Decision 94/904 EC, which sets out an EC hazardous waste list Article 1(4) of the 1991 Directive allows EC Member States to go beyond EC hazardous waste lists. The UK has taken up this option through setting out criteria by which waste, not on the hazardous waste list but possessing one or more of a limited number of hazardous waste properties, is also recorded as hazardous. |
| | | The figures are only estimates as hazardous waste arisings may be double-counted if they are subject to more than one movement. There will also be hazardous waste arisings on-site which do not need to be tracked and are thus not included in the data. |
| Zambia | 2005 2006 | Estimated amounts: For 2005: 57,000 metric tons and for 2006: 10,622 metric tons. The figures cover major waste types, the value will be higher when other waste types are considered. The information provided is an estimate from the industrial returns. |

Amt in litres: the listed Party remarked that the reported amount is in litres.

Amt in m3: the listed Party remarked that the reported amount is in cubic metre.

Blank cells: the listed Party either did not transmit its national report for the specified year(s) or was not required to transmit the national report depending on the date upon which it became a Party to the Convention.

Cell containing 0 (zero): the listed Party remarked that there was no such transboundary movement of hazardous wastes.

Estimated amt: the listed Party remarked that the reported amount is an estimated amount.

No data: the listed Party remarked that the requested data is not available.

No response: the listed Party did not respond to the specific item(s) of the revised questionnaire on 'transmission of information' (Tables 6, 7, 8A and 8B).

Pending clarification: the Secretariat sought clarification from the listed Party and did not receive any response (as at 22 June 2009).

For 'Serbia and Montenegro' see under 'Serbia'.

For 'Western Samoa' see under 'Samoa'.

For further information refer to 'Table 1: Total amount of hazardous wastes generated (as reported by Parties) 2004 - 2006' of this publication and tables containing 'data on export and import of hazardous wastes and other wastes', which can be accessed through the link http://www.basel.int/natreporting/questables/frsetmain.htm by clicking on 'data sources' at the Basel Convention website (www.basel.int/).

Table 3: Total amount of other wastes* generated (as reported by Parties) 2004-2006

^{*} Refers to wastes listed under Annex II: Y46-Y47 of the Basel Convention.

Blank cells: the cells are left blank when the listed Party (i) did not transmit its national report for the specified year(s) (ii) was not required to transmit the national report depending on the date upon which it became a Party to the Convention (iii) remarked that the reported amount is in litres, in cubic metres or an estimated amount (iv) remarked that the reported amount is for municipal waste or solid waste or urban and inert waste (v) informed that the requested data is not available (vi) did not respond to the specific item(s) of the revised questionnaire on 'transmission of information' (Tables 6, 7, 8A and 8B) or (vii) did not provide clarification sought by the Secretariat (as at 22 June 2009).

| Party | Year | Remarks |
|------------|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Albania | 2004 - 2005 | Reported amounts - 2004: Urban waste: 622 400 metric tons + inert waste: 591,000 metric tons and; 2005: Urban waste: 633,590 metric tons + inert waste: 645,000 metric tons. |
| Andorra | 2004 | Ce chiffre correspond à la totalité des ordures ménagères et de volumineux qui ont été collectés et exportés puisque notre installation d'incinération est fermée. |
| Armenia | 2004 - 2006 | Amounts in m ³ . Reported amounts - 2004: 1,405,600 m ³ ; 2005: 1,385,300 m ³ ; and 2006: 1,409,100 m ³ of household wastes were generated in Armenia. |
| Australia | 2004 | Incomplete data and reflects only what data gets collected and reported by the States and Territories. |
| Austria | 2004- 2006 | "Municipal wastes" means wastes collected from households and small shops. Detailed information is contained in the Federal Waste Management Plan edited in 1992,19995, 1998, 2001, 2006 and is available via the Focal Point. |
| Ausu 1a | | Y46 (municipal wastes): 1,382;600 metric tons. |
| | | Y46 (municipal wastes): 1,411,100 metric tons. |
| Azerbaijan | | Amounts in m3. Amounts refer to Municipal waste. Reported amounts – 2004: 7,400,000 m ³ and 2005: 7,300,000 m ³ . |
| Belarus | 2004- 2006 | Reported amounts - 2004: 3,954,600 metric tons; 2005: 3,181,282 metric tons; and 2006: 3,484,000 metric tons. An increase of the total amount of other (municipal) waste in 2004 is associated with pursuance of the new State Statistical Reporting Form according to which the Ministry of Housing and Utilities of the Republic of Belarus keeps account of all waste transported to disposal sites, including industrial waste (the Decree No.239 of the Ministry of Statistics and Analysis of the Republic of Belarus of 27.11.2003). In this connection, these figures include volume of municipal waste generation and non-hazardous industrial waste removed to disposal sites. |
| Belgium | 2004- 2006 | Figures are for Flemish region and for Y46. Reported amounts – 2004: 15,928 metric tons; 2005: 16,821 metric tons; and 2006: 16,799 metric tons. Y47 is included in Y18. Y46 contains: paint, varnish, glue, inks, resins, oils, solvents, acids, alkalis, cleaning products, batteries, mercury containing objects, chemicals, pesticides, cosmetics, fire extinguisher, photo chemicals, packaging of hazardous products and needles. |
| Bolivia | 2004- 2006 | Reported amounts - 2004: 771,562 metric tons; 2005: 750,728 metric tons; and 2006: 814,511 metric tons. Corresponde a residuos sólidos recolectados por Empresas Municipales de Aseo y depósitados en rellenos sanitarios autorizados, por tanto no corresponden a desechos peligrosos especificos. |
| China | 2004- 2006 | Definition of Y46: Solid waste transported to the incineration plant. Definition of Y47: By-products (ash and dross) produced from incineration. Total amount of other wastes generated includes only data of the Macao Special Administrative Region of P.R. China. There is no such data in other regions of China. Reported amounts—2004: 311,319 metric tons; 2005: 343,119 metric tons; and 2006: 352,092 metric tons. |

| The second control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of | 2004 - | As of 2008 (due to adoption of the new Ordinance on Environmental Emission Register) it will be possible to obtain the data collected only from households. Total amount of other wastes (Y46 and Y47) generated is referred as hazardous waste which is reported in group 20 (municipal wastes and similar commercial, industrial and institutional wastes including separately collected fractions, according to the List of waste), showing the data not only from households. A part of these quantities should not have been reported as municipal waste. Therefore Y codes 1-45 have been assigned to those quantities. The remaining quantities are shown as Y46. Reported amounts for Y46 – 2004: 12 metric tons; 2005: 90 metric tons; and 2006: 85 metric tons. |
| Estonia | | By Estonian Law there is no data collection according to Y-codes. Data collected according to the European Waste Catalogue. |
| Finland | 2004 - 2006 | The amount of other wastes refers to municipal waste from households as well as from other sources, such as shops, small industry etc. Reported amounts – 2004: 2,414,292 metric tons; 2005: 2,463,101 metric tons and; 2006: 2,545,167 metric tons. |
| Germany | | Household waste collection without separately collected fractions (e.g. paper, glass, packaging, bulky waste, biodegradable kitchen waste, garden and park waste). |
| Line of the second | | According to the Hungarian Legislation, residues arising from the incineration of household wastes (Y47) are hazardous wastes. Therefore, these wastes are included in both the total amount of hazardous wastes under Art. 1 (1)(b) generated and the total amount of other wastes generated (Annex II: Y46-Y47). |
| Ireland | 2004 - 2006 | Data from National Waste Database Reports 1995 and 1998 (household waste collected) and Local Authority Survey and Recycling Organisations Survey for 2000 (household waste collected). The quantity of waste generated under Y47 is nil. |
| Italy | | Figures refer to municipal waste. Reported amounts - 2004: 31,150,000 metric tons; 2005: 31,663,548 metric tons; and 2006: 32,522,650 metric tons. |
| Japan | | Y46-Y47 refers to municipal wastes from living activities and business activities. The amounts are those in respective fiscal years (from April to March). Reported amounts - 2004: 50,590,000 metric tons (Y46) and 4,868,000 metric tons (Y47); 2005: 52,730,000 metric tons (Y46) and 4,549,000 metric tons (Y47) and; 2006: 52,040,000 metric tons (Y46) and 4,363,000 metric tons (Y47). |
| Kazakhstan | 2004 | 3,781,000 metric tons - these are other wastes brought together to authorized dumps and grounds in 2004, i.e, Solid domestic wastes. |
| Latvia | 2006 | The sharp increase in the total amount of generated waste is caused by improvements in data collection system and obtaining of data from wider circle of respondents. |
| Monaco | | Y46 category results from the sum of: wastes from households in Monaco + selective collection of glass, papers and iron scraps+ wastewater treatment sludge. Households wastes from Monaco and those coming from France and Italy (no import from Italy since 2003) are immediatly incinerated, becoming the Y47 category. |
| | 2004- 2006 | Y46 - since 2004 a new methodology for collection of data has been used. Amount reported for Article 1 (1)(b) wastes includes amount generated for Y47. The National Waste Catalogue harmonised with the European Waste Catalogue is used for reporting. Since 2004, the national waste management legislation has changed. Slovakia as an EU member state transposes many of EU regulations into national legislation. Also the National Waste Catalogue was replaced by EWC for waste classification. |

National regional waste information system processes collected data on waste annually. Incorrect input data were reported by reporting units". |
| *Slovenia | 2004 .2006 | Y46 - since 2004 a new methodology for collection of data has been used. Data collected according to EWC codes. The presented data are correlated from EWC to Y codes on the basis of official statistical correlation between EWC and Y codes. |

| Party Ye | r Remarks |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Reported amounts - 2004: 2,273,5142 metric tons; 2005: 23,549,390 metric tons; and 2006: 5 - 23,648,032 metric tons. Figures refer not only to wastes collected from households (Y46), but to total amount of municipal wastes generated, which include wastes from commercial and service sectors when collected by municipalities. |
| Ukraine 200 200 | Until now the forms of statistic accounting on wastes and wastes nomenclature in Ukraine are not in accordance with the Basel Convention List. The accounting system dealing with waste generation in Ukraine is not perfect. E.g. reduction in the total amount of the IV class hazardous wastes in 2004 in comparison with 2003 is the result of excluding mining wastes from the category of hazardous (toxic) wastes and is not connected with any technical measures. |
| Party Ye | r Estimated amount |

Amt in litres: the listed Party remarked that the reported amount is in litres.

Amt in m³: the listed Party remarked that the reported amount is in cubic metre.

Blank cells: the listed Party either did not transmit its national report for the specified year(s) or was not required to transmit the national report depending on the date upon which it became a Party to the Convention.

Cell containing '0' (zero): the listed Party remarked that there was no such transboundary movement of other wastes.

Estimated amt: the listed Party remarked that the reported amount is an estimated amount.

Municipal waste: the listed Party remarked that the reported amount is for municipal waste.

No data: the listed Party remarked that the requested data is not available.

No response: the listed Party did not respond to the specific item(s) of the revised questionnaire on 'transmission of information' (Tables 6, 7, 8A and 8B).

Pending clarification: the Secretariat sought clarification from the listed Party and did not receive any response (as at 22 June 09).

Solid waste: the listed Party remarked that the reported amount is for solid waste.

Urban & inert waste: the listed Party remarked that the reported amount is for urban and inert waste.

For 'Serbia and Montenegro' see under 'Serbia'.

For 'Western Samoa' see under 'Samoa'.

For further information refer to 'Table 3: Total amount of other wastes generated (as reported by Parties) 2004 - 2006' of this publication and tables containing 'data on export and import of hazardous wastes and other wastes', which can be accessed through the link http://www.basel.int/natreporting/questables/frsetmain.htm by clicking on 'data sources' at the Basel Convention website (www.basel.int/).

Table 5: Transboundary movements of hazardous wastes and other wastes among all reporting Parties

As at 17/06/09 Figures are in metric tons and rounded to the nearest integer.

| Waste exported | 2004 | | 2005 | | 2006 | |
